

ENVIROSTOR DISCLAIMER

SMBRP takes several precautions to ensure that the site information in Envirostor is current, complete, and correct. Despite these efforts, errors and mistakes cannot be completely ruled out. SMBRP is not liable for the accuracy or misuse of the information provided. The content of EnviroStor is for informational purposes only, is not intended for use in calculating Cost Recovery's Statutes of Limitations, and cannot be relied upon to create any rights, substantive or procedural, or enforceable by any party in litigation with the State of California. DTSC reserves the right to change the information at any time.

SMBRP attempts to ensure that the map features are correct. Not all sites are represented on the Geographic Information System (GIS) map. Many sites are either historic in nature or are recent entries, which do not have coordinate information for their locations. Project locations are best estimates that SMBRP obtained or that third parties provided to SMBRP. Copyrights belong to SMBRP, the third-party providers, or SMBRP and the third-party providers. Some sites have a blue shaded circle around the square site indicator (buffer) on the EnviroStor map. The buffer shows the relative size of the site when a GIS shape file is not available. The buffer is only an approximation of the relative size of the site, and the radius of the buffer may include surrounding areas that are not part of the actual site.

SMBRP provides general site information in the project profile report. To obtain additional site information, SMBRP advises the user to: view source documents via links in the profile report; contact the assigned project manager; request assistance through the Envirostor help desk link ([EMAIL US](#)); or request to view public files through the California Public Records Act.
